The Regional Municipality of York is investing in building a safe, efficient and reliable Regional transportation network for all users. Improvements to the intersection of King Road and Weston Road in the Township of King will support growth and improve traffic flow.

Transforming the intersection of King Road and Weston Road

Construction began mid-July 2019 and once completed by fall 2020, improvements will include:

1. **Increasing traffic flow** by installing left-turn lanes on all four sides of the intersection
2. **Improving the condition of Regional roads** for motorists by:
 - Flattening the hill on King Road west of Weston Road
 - Repaving King Road from 540 metres west of Weston Road to Highway 400
3. **Meeting the needs of our communities** today and into the future by updating traffic signals and improving intersection accessibility
4. **Replacing aging infrastructure**

We recognize construction can be inconvenient and we are making every effort to minimize disruptions and keep residents informed with regular updates. Thank you for your patience.

King Road Temporary Road Closure

A weekend road closure is required to replace three culverts located on King Road between 7th Concession and Weston Road. To complete this work, **King Road is scheduled to be temporarily closed between 7th Concession and Weston Road from Friday, August 9, 2019 at 9 p.m. to Monday, August 12, 2019 at 5 a.m.** Local access will be maintained for properties within the closed section. Motorists are encouraged to use other adjacent Regional roads during this closure.

As with other road construction projects, some work may be rescheduled due to weather. York Region will provide advance notice whenever possible.

Safety

Safety is a priority on all Regional construction sites. For everyone's safety, please reduce your speed when travelling through the construction area. Please contact us if you have any safety concerns in and around the construction site.

To help manage your daily commutes during construction, travellers can plan their route in advance by using traffic and navigation tools. York Region provides real-time traffic and road information in open data, used by many app developers.

We're here to answer your questions. Accessible formats of this newsletter or communication supports are available upon request.
