Water Connection or Upgrade Permit

Application Guide

Description

A building permit application for a new or upgraded Municipal Water service connection may be required.

General Information

A building permit is required for any new or upgraded Municipal Water service. The Building Code identifies the minimum water service required to the structure. The building permit is for the private side of the lot only. A separate approval (and fee if applicable) is required from Public Works for the Municipal side on the property.

Required Documents and Drawings

Plumbing Data Form

All columns on the Plumbing Data Form are to be completed.

Start by counting how many of each fixture type or group are present in the existing and/or proposed structure. Next establish the Subtotal by adding up the number of occurrences per category. Then, multiply the Fixture Flow Rate for that category times the Subtotal of that category. Finally, add up each row total to confirm the Final Total at the bottom.

Required Forms

- **Application for a Permit to Construct or Demolish**
- **Municipal Connections Form**
- **Plumbing Data Form**
- **Letter of Authorization / Owner's Authorization Form** * if required

Required Fees

| | |
|--|---------------------|
| Permit Fee – Fee is based on size of service required, private side only | \$ Per By-Law |
| Public Works – Fee to be provided to applicant by Public Works for Municipal Upgrade portion | \$ per Public Works |

Additional Requirements/Approvals/ Applicable Law

The Building Code Act prohibits the issuance of a Building permit if the proposed construction or demolition will contravene any applicable law as defined in the Ontario Building Code.

elevations at the property line. **Note: Permit application required for Backflow Prevention Devices and for all ICI Servicing applications.**

Backflow Prevention:

In accordance with the Township's Water Use By-Law, 2014-73, as amended all ICI properties are required to install a premise isolation backflow prevention device on the incoming water supply line immediately after the water meter. More information regarding Backflow Prevention can be found on the Township's website at: <http://king.ca/Government/Departments/Engineering%20%20Public%20Works/Cross%20Connection%20Control%20Back%20Flow/Pages/default.aspx>

SECTION 6: CONDITIONS

- A copy of this application must be presented to the Township of King Building Division when applying for a permit. No work to be commenced until a permit has been obtained.
- This Permit is valid for six (6) months only.
- The location of the works as described above is approximate only. The Township will not be responsible for any damage to Municipal or private property incurred as a result of the installation of the service(s).
- The location of the works as described above is approximate only. The Township will not be responsible for any delays incurred or additional expenses resulting from services not being located according to municipally provided drawings.
- All water supplied to construction projects and development sites shall be metered and the use of such water charged back to the owner.
- A meter shall be installed and inspected by the municipality before the water shall be turned on and supplied to the property.
- Connections to the Municipal System(s) are to be made from Monday to Friday, between the hours of 8:30 a.m. to 4:30 p.m.
- Payment for capital charges must be either made in full or alternative arrangements with Finance must be in effect prior to connection.
- The Township will not allow connections to be made over weekends OR Legal holidays OR after regular working hours of the Township.
- Persons abandoning a well will require a well technician with a valid license. Well decommissioning must meet the regulations set out in Ontario Regulation 903 (Well Regulation) as amended made under the Ontario Water Resources Act and Wells Regulation Well Abandonment.
- Applicants are responsible to investigate the existing sewer lateral at the street line. Under no circumstance will the Township be held liable for the changes in final elevations due to field conditions. It is the Applicant's responsibility to check the final invert elevation of services and grades before the final basement elevation is set or the private portion of the connection is laid. No private services shall be installed prior to the Township connections being installed to the street line. The Applicant is responsible to make arrangements for the line and grade at street line with the Township Contractor.

I have read the information presented on this page and acknowledge and understand the Township of King's requirements for site servicing herein. I hereby undertake to perform the above described works in accordance with the above-noted conditions.
