

Update: Nobleton Groundwater Resource Evaluation

Notice of Groundwater Well Testing and Survey

The Regional Municipality of York is reviewing the groundwater supply in the community of Nobleton, in the Township of King as part of the Nobleton Groundwater Resource Evaluation (GWRE) program.

In 2021, York Region completed the Nobleton Water and Wastewater Servicing Municipal Class Environmental Assessment (Class EA) Study, which recommended the development of additional groundwater supply from Nobleton Production Well 2, located at 22 Faris Avenue. To gather more information on the Nobleton groundwater supply system, York Region will be constructing and testing groundwater monitoring wells at the following locations:

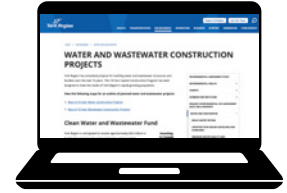

- 13740 Highway 27, Nobleton
- 22 Faris Avenue, Nobleton – Nobleton Production Well 2 facility
- Highway 27 right-of-way, adjacent to 12650 Highway 27, Nobleton

WHEN

- August to December 31, 2023

IMPACT

- Impacts to water and wastewater services are not expected
- York Region will be testing the groundwater wells after construction by continually pumping water from the wells for 24 to 48 hours. During the periodic pumping tests, the equipment on-site can operate up to 48 hours. Every effort to minimize noise will be made
- The Township of King has issued a Noise Exemption Permit, #2023-038 for the groundwater pumping tests
- Staff will be on-site for the duration of the groundwater well construction and testing
- Access to homes will be maintained

Groundwater Well Survey – Available until September 30, 2023

York Region is collecting additional information about groundwater wells around the three well testing sites to better understand local groundwater use.

As your property is located in the area we are inviting you complete the survey if you have not already done so.

To take the survey, visit york.ca/WaterConstruction. Select the King accordion and find the Nobleton Groundwater Resource Evaluation listing.

Information about your well may be available on the well record through your well drilling contractor or found on the Ministry of the Environment, Conservation and Parks record mapping tool at <https://www.ontario.ca/page/map-well-records>

Thank you in advance for your participation in the survey.

Visit york.ca/WaterConstruction for more information about York Region's water and wastewater construction projects. Follow [@YorkRegionGovt](https://www.facebook.com/YorkRegionGovt) on Facebook and Twitter.
